Katie,

We may try to get you on the phone on Monday afternoon, but don't know that for sure right now.

However, we are almost certain to want to talk to you and Steff and Steph sometime early next week. If there is any way for all three of you to be available on fairly short notice, that would be great.

We'll be in touch, and thanks for your cell phone number. Mine is Ex. 6 - Personal Privacy

Thanks,

George

Subject: meeting today and monday

David –

Thanks for the opportunity to participate today. It was really informative to hear how the conversation unfolded because I think we will find ourselves in a similar position with other companies across the nation soon. I know Bullseye wanted more answers from EPA but sadly we can't know anything magically about their plant that they don't. I want to apologize for bringing up the Ardagh facility. I had done the research ahead in case container glass came up and wanted to affirm that we knew there were no other glass sources of chromium in Portland and in my mind I strengthen that by knowing that this industry is generally reporting accurately (as we see since others are reporting), but it was inappropriate to bring up in this context and derailed the conversation, and for that I am truly sorry.

As for the meeting Monday. It sounds like it will hopefully be a candid technical conversation, which sounds very necessary given the position they have put you all in. I want to offer my support for that meeting and to say I am willing to participate and bring what I know about glass and melting chemistry to the table. I also want to request to participate because I think what is discussed has great impact for Uroboros, Spectrum and other facilities. Please consider if this makes sense for you. I didn't want to commit during the meeting today without consulting with you first (hence my answer this afternoon). Also I want your opinion on whether it would make more sense for me to come down there for it. I think that those conversations are easier in person and it will make it easier for me to read where the conversation is going/not going if I am there.

I welcome your thoughts and if you would like to discuss, feel free to call me. I'll be reachable on my

work cell most of the weekend or you can always call my personal cell
